## Professional Summary

---

Software Engineering with experience in full-stack development, cloud services, observability platforms, and competitive programming. Currently interning at Oracle, contributing to internal tools for database cloud operations using React, TypeScript, Python, Java, and OCI. Strong background in problem solving, teamwork, and high-performance environments through ICPC.

## Experience

---

- **Software Development Student Intern** July 2025 – June 2026  
*Oracle | Database Cloud Services Operations* Hybrid
  - Developed and maintained front-end features using **React, TypeScript, and Ant Design** to improve data visualization and internal workflows.
  - Integrated **REST APIs** and supported backend services in **Python and Java** for cloud operations tooling.
  - Contributed to **AI-powered internal tools** for feedback collection, analytics, and workflow automation.
- **Mobile Software Developer** October 2024 – January 2025  
*For Fundación Todas Brillamos & Toallas Zazil* Hybrid
  - Built an **Android app** (Kotlin) for **Fundación Todas Brillamos** supporting Toallas ZAZIL sales.
  - Delivered **backend** (Node.js + PostgreSQL, REST) and an **admin web** (React + Nginx).
  - Deployed with **Docker Compose** and added an **AI chatbot (LLaMA 3.1)** for FAQs and info.
- **Software Junior Developer** March 2022 – June 2024  
*At Soltis* Hybrid
  - Built and maintained **web apps/services** across **front end and back end**.
  - Set up **networks and security hardware** (cameras, LAN) and solved on-site issues.
  - Supported **IT project delivery**, improving internal workflows and reliability.

## Education

---

- **B.S. in Computer Science and Technology** Expected graduation: June 2026  
*Tecnológico de Monterrey, Campus Estado de México* GPA: 3.7/4.0 (92/100 equivalent)

## Certifications

---

- **Oracle Cloud Infrastructure 2025 Certified Foundations Associate** October 2025
- **Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate** October 2025

## Achievements

---

- **ICPC México Finalist 2025** November 2025  
*Ranked #94/140 in the ICPC México Finals.*
- **ICPC México Finalist 2024** November 2024  
*Ranked #88/120 in México Finals and #305/475 in Latin American Regional Contests.*

## Technical Skills and Interests

---

**Languages:** C++, Python, TypeScript, Java, JavaScript, Rust, Kotlin.

**Full-Stack:** React/TypeScript front ends, Java/Python/Node.js back ends, REST APIs, PWAs.

**Cloud, Data & Tools:** OCI, Docker, DevOps, SQL/cloud databases, Git/GitHub/Bitbucket, JIRA.

**Interests:** Competitive programming, LEGO, Soccer (Ex-Profesional Third Division Soccer Player), Videogames, Anime.

# Projects

---

- **FWC 2026 Sticker Album Tracker** 🗓

May 2026

*Mobile-first PWA for tracking missing, duplicate, and tradeable stickers.*

- **Frontend development:** Built a mobile-first PWA with React, TypeScript, and Vite for sticker collection tracking.
- **State persistence:** Implemented a 994-sticker catalog with local progress tracking through localStorage.
- **Backend integration:** Added optional Supabase authentication and cloud synchronization for progress and trades.
- **CI/CD deployment:** Configured GitHub Pages deployment with GitHub Actions and Vite production routing.

- **WhisperTrend Market Intelligence Platform** 🗓

January 2025 - June 2025

*Correlates market moves with news and social sentiment*

- **Web development:** Designed React and TypeScript dashboards for market data visualization.
- **Backend engineering:** Built Rust APIs and data workflows for platform integration and automation.
- **Data pipeline:** Automated collection and aggregation from multiple sources to correlate trends with news and sentiment.
- **Infrastructure:** Deployed containerized services with Docker Compose to streamline setup.
- **Impact** Enabled actionable insights and supported strategic decision-making through a robust, end-to-end platform.

- **Smart Traffic Multi-Agent System** 🗓

August 2024 – December 2024

*Python-based traffic simulation optimizing flow via smart agents.*

- **Agent modeling:** Designed vehicle, pedestrian, and traffic-light agents using PEAS and AUML.
- **Coordination logic:** Built message protocols and rules for real-time coordination between agents.
- **Architecture:** Developed AUML/UML organization and interaction diagrams for inter-agent behavior.
- **Simulation:** Implemented the environment in Python (Mesa) with adaptive behavior based on traffic density.
- **Impact** Improved simulated traffic flow by enabling smart light coordination and pedestrian safety mechanisms.
